PRODUCT INNOVATION

Located in Greensboro, North Carolina, the Innovation Center of Excellence (ICE) is a state-of-the-art research and development facility designed to foster collaboration and harness the collective expertise found across our businesses. Home to many of the industry's most brilliant chemists, the ICE facility features liquid and powder application labs, resin development and analytical labs, a sample production area, and a formulation lab, among other resources. It will also serve as a destination for onsite customer training and application trials.

PRODUCT PORTFOLIO

POWDERS

Specializing in powder coatings for over 35 years, TCI offers a complete range of powder options designed to provide performance, quality, and value. Our product portfolio is perfectly suited for those customers and markets that require a durable yet beautiful powder coating finish with regional warehouses located across North America to support your business needs.

LIQUIDS

Our new liquid industrial coatings feature solvent-borne and waterborne technologies, built on a variety of resin platforms, which can be customized to suit your performance and color needs. The product line offers many price/performance, VOC, dry time, and other options that can be tailored to meet nearly any liquid industrial coating needs.

TOUCHUPS

TCI now offers matching liquid touch-up paint perfect for correcting unforeseen damage to the original TCI powder coating while reinforcing brand loyalty to the customer. These touch-ups are available for all TCI stock colors and come in aerosol, pen, and brush in bottle applications to meet your precise repair requirements extending the life of your products.

OUR COLORS

TCI stocks hundreds of powder products available in a variety of colors, textures, and effects ready to ship. In addition to our general stock color card, we stock 150+ Super Durable Polyester RAL colors and TCI's TruDurance Architectural Powder Coatings, which meet AAMA & Qualicoat specifications.

**All stock powder colors can be formulated in liquid and touchup forms.*

TECHNICAL SERVICES

At TCI Powder Coatings, we offer our customers first-class technical support for powder and liquid coating products both inside the lab and in the field. Our elite group of professional service technicians are dedicated to helping each of our customers develop and maintain efficiency and cost savings.

- Provide support focused on process and material utilization improvements
- Implement testing and research to improve operation and solve problems
- Audit total powder and liquid systems, including racking, material handling, pretreatment, curing, and powder application / recovery
- Audit systems for efficiency and productivity
- Provide gun set up advice for efficiency
- Measure application variables, including ground, flow rates, electrostatic settings, etc.
- Analyze racking arrangements for maximum efficiency
- Conduct on-site application training for our customers
- Analysis defects and assist with corrective action

SUPPORT

A relationship with TCI provides expert support, troubleshooting, testing, research, audits, equipment and defect analysis, corrective action plans, and training.

EXPERTISE

We use our diverse knowledge and experience to help you fully understand the total applied cost of your coating operation.

OPTIMIZATION

We dig deep into your operation to evaluate and identify the areas of optimization for your process and lower your overall coating costs.

CERTIFICATIONS & ASSOCIATIONS

ADDITIONAL SERVICES

COLOR MATCHING

Our TruExpress powder color matching program can quickly match your color in 3 days or less once your project is approved by our product development lab.
