# **Specification Comparison Chart**

-							
Test Parameter	9000 Series AAMA 2603-22	10000 Series AAMA 2604-22	11000 Series AAMA 2605-22				
	1-Year	5-Year	10-Year				
Pretreatment	Multi stage cleaning and pretreatment system	Multi stage cleaning and pretreatment system, chrome and non-chrome	Multi stage cleaning and pretreatment system, chrome and non-chrome				
Pretreatment Coating Weight	Non specified	Chrome 30mg/ft <sup>2</sup> minimum	Chrome 40mg/ft <sup>2</sup> minimum				
Film Thickness	2-4 mils	2-4 mils	2-4 mils				
Repairability		See film touch up and repair procedures					
Sealant Compatibility	Meet performance requirements of AAMA 800 sealant specification						
Hardness	Н-2Н	Н-2Н	Н-2Н				
	Values represent TCI product characteristics						
Dry Adhesion		No loss of adhesion					
Wet Adhesion		No loss of adhesion					
Boiling Water Adhesion	No loss of adhesion						
Impact Resistance	N	lo film removal on min. 3 mm deformation					
Abrasion Resistance	N/A	Abrasion coefficient $\geq$ 20 min	Abrasion coefficient $\geq$ 40 min				
Muriatic Acid		No change after 15 minute spot test					
Mortar Resistance	No adhesio	on loss or appearance change after 24 hou	r pat test				
Nitric Acid Resistance	N/A	5 DE max color change afte	r 30 minute vapor exposure				
Detergent	No ch	ange or adhesion loss after 72 hour imme	rsion				
Window Cleaner	N/A	No change or adhesion lo	ss after 24 hour spot test				
Humidity Resistance	1,500 hours: no more than "few" blisters size 8, figure #4 ASTM D 714	3,000 hours: no more than "few" blisters size 8, figure #4 ASTM D 714	4,000 hours: no more than "few" blisters size 8, figure #4 ASTM D 714				
Corrosion Resistance	1,500 hours of salt solution: minimum rating of 7 on scribe or cut edges: minimum blister rating of 8 in the field (ASTM D 1654) ASTM D 714	1,500 hours of cyclic corrosion per ASTM G85, Annex 5: minimum rating of 7 on scribe or cut edges: minimum blister rating of 8 in the field (ASTM D 1654)	2,000 hours of cyclic corrosion per ASTM G85, Annex 5: minimum rating of 7 on scribe or cut edges: minimum blister rating of 8 in the field (ASTM D 1654)				
Outdoor Resistance	1 year south Florida: maintain film integrity; no adhesion loss, slight chalking or fading	5 years south Florida: maintain film integrity; 5 DE (Hunter) maximum color change; chalking (ASTM D 4214) $\leq$ 8; gloss retention $\geq$ 30%; erosion resistance less than 10% film loss	10 years south Florida: maintain film integrity; 5 DE (Hunter) maximum color change; chalking (ASTM D 4214) $\leq 8$ ; gloss retention $\geq 50\%$ ; erosion resistance less than 10% film loss

TCI's TruDurance architectural powder coatings have outstanding long-term durability, including excellent color and gloss retention. In addition, these products exhibit impressive corrosion, mar, and scratch resistance as well as over-bake stability on the applicators line. Our products are environmentally responsible and offer a great alternative to other coating options. The 10,000 series products are AAMA 2604 quality, 11,000 series are AAMA 2605 and products can be matched in TGIC-free chemistry at your request. TCI also offers quick turnaround times on color matches and small batch orders.

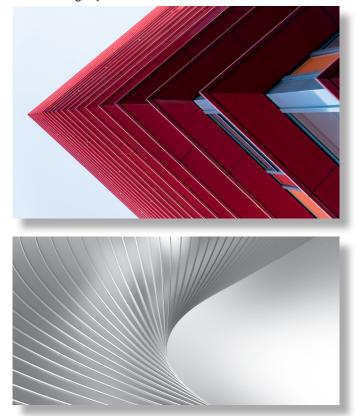

For more information please contact your TCI Sales Representative.

### Stock AAMA 2604 RALs

RAL Number Product Name Product Code

These RAL products meet the AAMA 2604 specification. Stock options subject to change, please check with your local TCI sales representative for MTO lead times.

## 0 Series

#### **AAMA 2603 Specification**

TCI 9000 Series Polyester Systems have the broadest formulating range in color and gloss, and many will meet or exceed AAMA 2603

performance requirements. Products in this series have a 60° gloss range of 5-90° + and meet many decorative and functional requirements for chemical resistance, physical properties, color, gloss, and weatherability. High chroma colors are also available. Typical uses include aluminum extrusions, playground equipment, agricultural equipment, and machinery.

## 11000 Series

#### **AAMA 2605 Specification**

The TCI 11000 Series Highest Exterior Performance Organic Systems are formulated to meet the requirements of the AAMA 2605 specification. Products in this series, with the exception of anodized products, have a 60° gloss range of 25-70° + and are available in many colors. Proper amorphous chromium phosphate or amorphous chromate pretreatment is critical for product performance. Chromium chromate or chromium phosphate coating weights should be a minimum of 40 mg/ft<sup>2</sup>. Alternative chrome and/or non-chrome conversion coatings should be maintained according to supplier's recommendations. A TCI technical representative must audit each application system to ensure products will meet the 2605 specification.

## TruDurance

#### **TCI Certified Applicator**

TCI field technicians are trained to audit all aspects of the powder coating operation to determine the customer's ability to achieve AAMA requirements. TCI runs a variety of tests that evaluate the performance of our powder coatings in the customer's process and continues with bi-annual renewal audits to ensure the process parameters have not changed without notification. For TCI Certified Applicators, warranties are available for 2603, 2604, and 2605 applications.

# 0000 Series

#### AAMA 2604 Specification

The TCI 10000 Series Superior Exterior Performance Polyester Systems are formulated to meet the requirements of the AAMA 2604 specification. Products in this

series have a 60° gloss range of 5-90° + and are available in a wide selection of colors. Proper chrome or non-chrome pretreatment is critical for product performance. Chromium Chromate or chromium phosphate coating weights should be a minimum of 30 mg/ft<sup>2</sup>. Alternative chrome and/or non-chrome conversion coatings should be maintained according to supplier's recommendations. A TCI technical representative must audit each application system to ensure products will meet the 2604 specification.
